Mission

We clarify and connect care journeys for you and your loved ones

Manifest (Mission statement)

Following the radical product thinking framework:

[Today, when] people face healthcare challenges, **[they want to]** understand what's happening, know what to do, and loop in their loved ones, **[but they have to]** navigate a healthcare communication crisis where most of what doctors say is forgotten or misunderstood at the most crucial moments. They wrestle fragmented portals, decipher complex medical jargon, and struggle to explain what the doctor said when family members ask for updates."

[This is unacceptable because] in a world where everything seems connected, people still can't easily access, understand, or share their own medical information. It's easier to follow your niece's gap year than your mother's healthcare journey. Healthcare systems overlook that health challenges affect entire networks of people who want to help, but lack the information to do so effectively.

[We envision a world where] people navigate healthcare with clarity and connection—where medical information is always understandable and flows seamlessly within your care circles, transforming anxiety into confidence and confusion into action.

[We're bringing this world about through] Ditto, the Polarsteps of healthcare - turning an overwhelming journey into something you can understand, document, and share with your loved ones. We build for humans, not systems, with careful attention to people and careless disregard for broken conventions.

Tagline

Care. Clarified.

Brand Proposition (User-focused)

Care, Clarified

Healthcare shouldn't be a puzzle. Yet today, scattered information, complex medical language, and rushed appointments leave you feeling lost and overwhelmed. When something as important as your health is at stake, you deserve clarity and the support of those who care about you.

Ditto transforms confusion into confidence by putting your complete health story in your pocket and connecting your care circle when you need them most. Our solution helps you:

- **Capture** every aspect of your health in one secure place
- **Clarify** medical information through simple, human explanations
- **Connect** with your care circle, always on your terms

With Ditto, you'll walk into appointments prepared, understand what's happening with your health, and bring those who matter into your care journey. What was once fragmented becomes a coherent health story that empowers you and enables meaningful support from your loved ones.

This isn't another medical portal. It's healthcare reimaged—where clarity and connection so you can act, rather than be patient.

Variation with central brand values

Internal - Culture	Brand value	External - Positioning
• Every decision should advance our mission, if it doesn't, we don't do it • High standards are the standard, we push each other to excel • We hire exceptional talent and expect exceptional work	1. Mission Above All <i>We're building something that matters</i>	• To transform healthcare by making the complex understandable • Care, Clarified • Clarity creates confidence and empowerment
• Only a healthy team can create magic • Team wins together • Be tough on problems, kind to people	2. Humans over Systems	• Built for humans, not systems • Every feature starts with your needs, not institutional convenience • Healthcare revolves around people
• Build more, talk less • Ship fast, learn faster • Work smarter with AI and automation	3. Upward and Onwards <i>To boldly flip the system</i>	• We embrace boldness as necessary for meaningful change • Challenge conventions when they don't serve patients
• Seek out viewpoints that challenge our assumptions • Our users are diverse, our team should reflect that reality • Inclusion isn't a program, it's how we operate	4. For Everyone <i>No barriers. Your health, your network, your way.</i>	• Boundless connections - your care network, defined by you • Connect with everyone who matters, without barriers • Healthcare understanding for all backgrounds

• Own it completely • Take responsibility without excuses • Execution beats everything	5. Empowered Action <i>Own it. Ship it. Learn from it.</i>	• Take meaningful action within your control • When you understand your health, you can make informed decisions • Clarity becomes the foundation for empowerment

 BELOW THIS WILL BE UPDATED STILL

Oneliner

Ditto transforms medical confusion into clarity in one simple app—giving you the confidence to understand, manage, and share your health journey on your terms.

Brand Personality

Our voice is:

Clear & Direct

We eliminate jargon and unnecessary complexity. Clarity for patients should be reflected in the way we communicate everywhere. We reject fluff, avoid overcomplications, and speak plainly. When healthcare feels like a maze, we want to be the straightforward path forward.

Empathetic & Personal

We recognize the emotional weight of health management because we've been there too—as patients and caregivers. We've witnessed firsthand how confusing care can be and acknowledge that health literacy varies widely. We understand that while health is deeply personal and private, the right support can transform the experience. Our messaging towards patients and healthcare providers can lean towards personal and committed.

Bold & Authentic

As a young, mission-driven company, we embrace boldness as necessary for meaningful change. The healthcare status quo emerged from conventions that now create innovation deadlocks. We challenge these when they don't serve patients. We're built for people, not systems.

Trustworthy & Credible

Our expertise in healthcare, AI, and data security forms our foundation of credibility. We prioritize security and privacy not because regulations demand it, but from deep conviction. Our data philosophy stands apart: we don't monetize user data—in fact, we architect our systems specifically to limit our access to it. Yet we refrain from dogmatism, challenging conventions and rules whenever they create barriers rather than benefits for patients.

Below is pure and somewhat old draft. Need to gather the branding input as well for this

Value proposition - per segment

Category	Audience	Painpoints	What they want to achieve	How we help them achieve this
Primary	Older people with increased care need	• Health Management: Seniors face difficulties in understanding their current health conditions and what actions they need to take. Information about their health is often scattered and hard to access.	• Clarity and Confidence: Seniors wish to better understand their health status to feel confident about their future and reduce mental load. • Quality Time: They desire to shift focus from health-related conversations to quality time with family and friends, making memories without worrying about health issues.	• Unified platform that captures all medical information in one simple interface • Complex medical terminology explained in plain, accessible language • Simplified digital interface designed specifically for users with limited technical skills • Easy-to-use sharing features that let them control what health information to share and with whom • Tools to organize appointment details and treatment plans in one place (future) • Clear presentation of health status and options to support informed decision-making

		• Digital Skills: There is insecurity about their digital skills, leading to feelings of being lost when using different platforms and tools. • Emotional Concerns: Seniors worry about their health affecting their loved ones and don't want others to constantly ask about their health status.	• Self-Care: Seniors aim to take better care of themselves and prevent age-related ailments.	• Support in preparing for healthcare appointments, such that you feel confident and in control
Children , family, caregivers, of loved ones of people who require care	• Healthcare Navigation: The care network struggles with navigating the complex web of healthcare and lacks	• Support and Involvement: The care network wants to feel supported and involved in the health status of seniors, ensuring they can provide help effectively.	• Simple sharing features that connect the entire care network with appropriate permissions • Comprehensive health narrative that provides complete and accurate information • Practical tools for managing appointments, medications, and care logistics (future feature)	

access to important healthcare data of their loved ones.

- **Time Management:** Joining hospital appointments and arranging practicalities for seniors is time-consuming and challenging.
- **Emotional Impact:** The health of seniors affects the care network emotionally, as they love and care deeply for them. They are concerned about the truthfulness and completeness of the information

- **Reduced Responsibility:** They wish for less responsibility in acting as messengers and want practicalities to be easier to manage.
- **Emotional Connection:** The care network wants seniors to feel valued and important, emphasizing the significance of their health because they care deeply for them.
- By understanding these problems and wishes, solutions can be tailored to improve the quality of life for seniors and their care network, fostering a supportive and efficient healthcare experience.

- Secure access controls that respect patient privacy while enabling necessary support
- Ability to share support in a timely and personal manner

		shared by seniors.		
	People with an heavy and intense care journey, e.g. cancer	• Overwhelmed due to emotional load and sudden flip of life • High information load with really complex information • Emotionally impacted with wish to feel supported in healthcare and network	• Information Management: Better organization of complex care information • Treatment Understanding: Clearer comprehension of options and processes • Support System: Stronger connection with those who can provide assistance • Sense of Control: Feeling empowered rather than victimized by illness • Focused Energy: Preserve strength for recovery rather than administrative tasks	• Unified organization of complex medical information from multiple specialists • Plain language explanations of specialized treatments and options • Simple tools for sharing updates with support network and getting support back • Comprehensive tracking of entire care journey in one place • Support in preparing for healthcare appointments, such that you feel confident and in control when making critical healthcare decisions
	People with a language barrier	• Lack of Understanding: Difficulty comprehending what is	• Clear Comprehension: Understand their healthcare	• Medical terminology explained in plain, accessible language • Visual explanations that transcend language barriers

	happening in their care • System Unfamiliarity : Confusion navigating unfamiliar healthcare systems • Cultural Differences: Misalignment between cultural expectations and care delivery • Communication Challenges: Inability to accurately express concerns or understand instructions • Information Retention: Struggle to remember verbal information given in non-native language	situation and options • System Navigation: Successfully work within unfamiliar healthcare structures • Effective Communication: Express needs and understand providers accurately • Cultural Respect: Receive care that respects their cultural background • Information Access: Review medical information in a format they can process	• Simplified presentation of healthcare processes and systems • Translation tools to improve communication with providers • Local Information storage that allows sharing across borders

Key Differentiators (Explicit)

1. **Patient-First Design Philosophy:** Unlike portals created by healthcare providers, Ditto is built entirely from the person's perspective, making it intuitive and relevant by design.
2. **Understanding, Not Just Access:** While others focus on providing access to medical records, Ditto transforms complex medical information into clear, actionable insights using proprietary reliability technologies.
3. **Cross-System Integration:** Ditto uniquely bridges the gaps between healthcare systems, offering comprehensive care paths that transcend institutional boundaries.
4. **Customizable Care Networks:** Ditto empowers you to build personalized healthcare support networks with anyone you choose—not limited to those designated by the system.
5. **Privacy by Architecture:** Our technical foundation ensures your health data remains under your control, without ever being exposed to us or third parties.
